

## Studymate Foundation Paper

Date : 23/12/2018  
Duration : 90 Min.  
Max. Marks : 90

**Accountancy, Economics  
& Mathematics/Business Studies  
(Set-2)**

**CLASS**

**XI**

### General Instructions:

- All questions are compulsory in each section.
- Each question is allotted **ONE** mark for each correct response.
- No deduction from the total score will be made if no response is indicated for the question in the answer sheet.
- There is only **ONE** correct response for each question. Filling up **MORE THAN ONE** response in each question will be treated as wrong response.
- This paper contains 90 questions (Accountancy 1-30, Economics 31-60 and Mathematics 61-90 / Business Studies 61-90).
- It is **MANDATORY TO ATTEMPT** Accountancy, Economics and attempt **ANY ONE** of either Mathematics or Business Studies.
- Use of calculators is not allowed.

### (Accountancy)

- A Machine was purchased on 1st April, 2008. The balance of this machine on 31st March, 2011 is ₹4,37,400. Depreciation is charged @10% p.a. on written down value Method. What was the cost price of machine (on 1st April, 2008)?  
(A) ₹ 8,00,000 (B) ₹6,24,000 (C) ₹6,00,000 (D) None of these
- A bill drawn on 23.11.2010 as payable 2 Months after date was accepted on 24.11.2010. The date of maturity of the bill will be-  
(A) 26.01.2011 (B) 25.01.2011 (C) 23.01.2011 (D) 27.01.2011
- A second hand machine is purchased for ₹90,000 amount paid to repair the machine ₹10,000 and transportation cost is ₹20,000. While passing journal entry machine account will be debited by:  
(a) ₹90,000 (b) ₹1,00,000 (c) ₹1,20,000 (d) None of these
- The accountant of M/s ABC Ltd. is not able to tally the trial balance. The difference in trial balance is due to:

Head of account	Debit	Credit
Salary	2,000	
Miscellaneous expenses	2,000	
Misc. receipt	1,000	
Purchase return	1,000	
Sales		5,000
Purchase	3,000	

- Wrong placement of salary account.
- Wrong placement of miscellenous exp.
- Wrong placement of misc. receipt and purchase return.
- None of these

5. Credit balance as per cashbook was ₹5,000 on 31.12.2018, if cheque issued but not presented amounts to ₹2,000 and direct deposit by customer amounted to ₹10,000, calculate balance as per pass book should be:
- (a) ₹7,000 debit                      (b) ₹7,000 credit                      (c) ₹17,000 credit                      (d) None of these

**Directions for the Question 6 to 8:** In each of the questions given below, there are two statements marked as Statement (A) and Statement (B). Mark your answer as per the codes provided below:

- (A) Both A and B are true and B is correct explanation of A.  
(B) Both A and B are true and B is not correct explanation of A.  
(C) A is true and B is false.  
(D) A is false and B is true.
6. **Statement (A):** Provision for discount is made on debtors after subtracting further bad debts and new provisions.  
**Statement (B):** Only those debtors who pay money immediately are given discount.
7. **Statement (A):** Accounts follow accrual basis of accounting.  
**Statement (B):** Revenue is deemed to be realised when the title or the ownership of the goods has been transferred to the purchaser and when he has legally become liable to pay the amount to seller.
8. **Statement (A):** To reduce the burden of journals and avoid duplicity subsidiary books are prepared.  
**Statement (B):** Cash book is a substitute book for cash account and bank account.
9. Life insurance premium paid by firm of ₹10,000, should be treated as follows  
(A) Credited to profit and loss A/c                      (B) Debited to Trading A/c  
(C) Deducted from capital                      (D) Deducted from sales
10. When a cheque received is endorsed, it must be entered on  
(A) Debit side of Cash book                      (B) Credit side of Cash book  
(C) Journal Proper                      (D) Both the sides of cash book
11. From the following information calculate gross profit:  
Opening stock ₹50,000, closing stock ₹80,000, carriage on purchase ₹15,000, carriage on sales ₹25,000, sales ₹15,00,000 cost of goods sold ₹12,10,000.  
(a) ₹2,75,000                      (b) ₹2,65,000                      (c) ₹2,90,000                      (d) ₹3,05,000
12. Calculate closing stock from the following details:  
Opening stock ₹2,40,000; Sales ₹9,75,000; Purchases ₹6,80,000; Depreciation ₹2,00,00; Stock lost by fire ₹10,000; Gross profit is 30% on cost.  
(a) ₹1,70,000                      (b) ₹1,60,000  
(c) ₹3,95,000                      (d) ₹7,50,000

- 13.** Which of the following statements is not true:
- Balance sheet is prepared on a particular date and not for a particular accounting period.
  - Marshalling means showing the asset and liabilities in a proper order in the balance sheet.
  - Grouping means showing the items of similar nature under a common heading.
  - The least liquid asset is shown first in order of permanence.
- 14.** Bill discounted but not matured is
- Current liability
  - Contingent liability
  - Current asset
  - Intangible asset
- 15.** What will be the amount of operating profit from the following information:
- |                                  |                       |
|----------------------------------|-----------------------|
| Net profit ₹2,50,000             | Factory rent ₹7,000   |
| Loss on sale of furniture ₹6,000 | Salary ₹60,000        |
| Dividend received ₹3,000         | Rent received ₹12,000 |
- ₹2,56,000
  - ₹2,41,000
  - ₹2,35,000
  - None of these
- 16.** Shyam our debtor for ₹2,500 had defaulted and the amount had been treated as bad debts. He has now paid ₹2,000. What amount should be credited to Shyam account?
- ₹2,000
  - ₹2,500
  - ₹500
  - None of these
- 17.** Salary of manager is \_\_\_\_\_ and appointment of manager is \_\_\_\_\_
- Compulsory – optional
  - Event – transaction
  - Transaction – event
  - None of these
- 18.** Outstanding expense are recorded in the books of account because of which principle of accounting?
- Prudence
  - Dual aspect
  - Accrual
  - All of these
- 19.** If capital is ₹5,00,000, loan is ₹2,50,000 and creditor is of ₹50,000 then total asset of the firm is
- ₹8,00,000
  - ₹5,00,000
  - ₹7,50,000
  - ₹5,50,000
- 20.** Nature of input CGST is
- Liability
  - Expense
  - Revenue
  - Asset
- 21.** Preparation of Trial Balance, Profit & Loss A/c and Balance Sheet come in the stage of
- Recording
  - Measuring
  - Classifying
  - Summarising
- 22.** Which of the followings is/ are not the qualitative characteristics of accounting information
- Reliability
  - Communication
  - Summarising
  - Relevance
- Chose the correct option
- (i) & (ii)
  - (ii) & (iii)
  - (i) & (iii)
  - (iii) & (iv)

- 29.** Mr. A started a business on 1st April, 2013 with a capital of ₹1,50,000 and a bank loan of ₹1,00,000. On 31st March 2014, his assets were ₹2,25,000 calculate closing capital and Profit/loss the year
- (a) ₹75,000 and ₹1,25,000 (b) ₹1,25,000 and (₹25,000)  
(c) ₹2,50,000 and ₹75,000 (d) None of these
- 30.** \_\_\_\_\_ is offered and allowed on sales completed in the past.
- (a) Trade discount (b) Cash discount  
(c) Rebate (d) None of these

### (Economics)

- 31.** The captain of the cricket team has to select either of the two batsman A and B for 5-day match between India and Pakistan. He needs a more consistent player. Please support him as whom to select based on the data of their earlier performance

Batsman A

Batsman B

$$\bar{X} = 70$$

$$\bar{Y} = 62$$

$$\sigma_x = 34$$

$$\sigma_y = 13$$

The option are-

- (a) Batsman A as his average score is high.  
(b) Batsman A as his standard deviation is high.  
(c) Batsman B as his coefficient of variation is lesser than that of B.  
(d) Batsman A as his coefficient of variation is higher than that of B.
- 32.** What type of correlation exists between the marks of Economics and Hindi in the data given below?
- |                   |    |    |    |    |    |    |    |    |    |    |
|-------------------|----|----|----|----|----|----|----|----|----|----|
| Economics (Marks) | 77 | 54 | 27 | 52 | 14 | 35 | 90 | 26 | 56 | 60 |
| Hindi (Marks)     | 35 | 58 | 60 | 46 | 50 | 40 | 35 | 56 | 44 | 42 |
- (a) Positive and linear (b) Negative and linear  
(c) Positive and non-linear (d) Negative and non-linear
- 33.** Three students of class XII, Arun, Nitika and Rahul were given the task of selecting a sample of 16 students from a class of 50 students. Arun got the list of roll numbers of student and then took student after regular interval of 5. Nitika divided the entire class into boys and girls and then draw a sample of 5 student from each group. Rahul picked up his 10 friends in the sample. Which methods were used by them.

- (a) Arun - Judgement (b) Arun - Judgement  
Ritika - Stratified Ritika - Systematic  
Rahul - Systematic Rahul - Stratified
- (c) Arun - Systematic (d) Arun- Systematic  
Ritika - Stratified Ritika - Judgement  
Rahul - Judgement Rahul - Stratified

34. Errors of origin arises due to
- Incomplete data and non response of students.
  - Wrong calculation.
  - Wrong interpretation of data
  - Inappropriate definition of unit, scale or defective questionnaire
35. If  $f_1 = 30$ ,  $f_0 = 25$ ,  $f_2 = 24$ ,  $L_1 = 40$  and  $i = 20$ , the value of mode will be
- 39.9
  - 42.09
  - 47.09
  - 49.09
36. A statistical tool which tells us how items in a particular group is spread out from the average value is called
- Correlation
  - Mode
  - Median
  - Standard deviation
37. Average daily wage of 50 workers of a factory was Rs. 200 with standard deviation of Rs. 40. Each given a raise of Rs. 20. The new average daily wage and standard deviation will be
- 220, 60
  - 220, 40
  - 200, 40
  - 200, 60
38. If CBSE is interested in knowing the minimum marks in Economics of top 25% of the students, it will calculate
- First quartile
  - Median
  - third quartile
  - Fifth decile
39. Area under frequency polygon is equal to the area under
- Less than ogive
  - Histogram
  - Pie diagram
  - More than ogive
40. The pie diagram of market share of 4 brands of TV sold in Bhopal are given below

<b>Brands of sets</b>	<b>Units sold in Panipat</b>
Samsung	480
Akai	360
Onida	240
Sony	120

Which of the below mentioned conclusion will be correct.

- Share of Akai is greater than share of Samsung.
  - Samsung holds the maximum market share with 30%.
  - Akai and Onida both have maximum share of 40%.
  - Sony has 10% share in the market.
41. Improvement in skills of labour will be shown by
- a point on PPC to the point inside the PPC.
  - a leftward shift of PPC.
  - a rightward shift of PPC.
  - a point inside the PPC to the point on PPC.

- 42.** With an increase in income household A starts consuming more of full cream milk and less of double toned milk while household B starts consuming more of double toned milk and less of single toned milk. Identify the correct statement.
- For household A – full cream is inferior good and double toned is a normal good.
  - For household B – double toned is a normal good and single toned is a inferior good.
  - For both households A and B – single toned is an inferior good.
  - For both households A and B – double toned is a normal goods.
- 43.** Based on the graph drawn below identify the correct statement.
- Elasticity at point A is more than at point B.
  - Elasticity at point B is more than at point A.
  - Elasticity is same at both the points and is equal to zero.
  - Elasticity is same at both the points and is equal to infinity.
- 44.** When  $MP > AP$ , and MP is falling, AP is
- rising
  - falling
  - at maximum
  - none of above
- 45.** If price of X remains Rs. 4 and price of Y increases from Rs. 2 to Rs. 4, what will happen to the slope of budget line?
- slope will remain same
  - slope will increase
  - slope will decrease
  - none of the above
- 46.** If  $\sum X$  (wrong) = 10,600, correct mean = 264.125, incorrect item = 150, number of item = 40, then find the value of correct item.
- 100
  - 120
  - 115
  - 200
- 47.** Which of the following statement is correct for given bar diagram

- Factory B is spending more percentage on wages as compared to factory A.
- Factory A is selling at a higher price than cost price.
- Factory B is making more profits than factory A.
- Factory B is selling at a higher price than the cost price.

48. The formula,  $\text{Mode} = 3 \text{ Median} - 2 \text{ Mean}$  will apply to which of the diagram drawn below

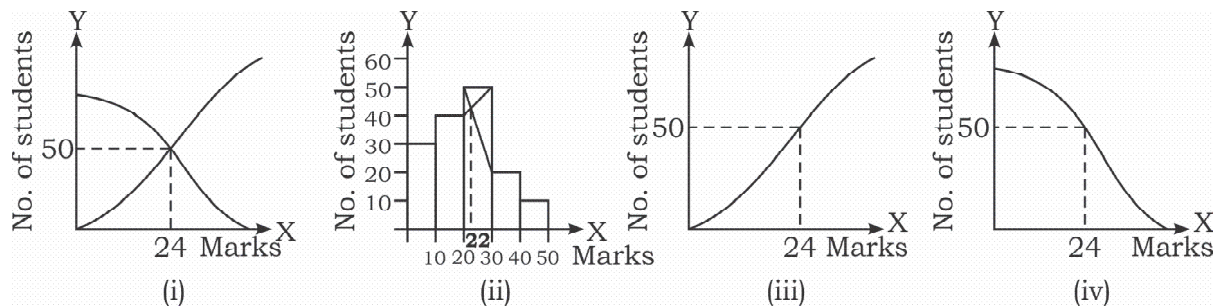

- (a) (i), (ii) and (iii)      (b) (i) and (ii)      (c) (i) and (iii)      (d) (ii) and (iii)

49. If  $\sum fm = 1,765 + 45f$  and  $\sum f = 33 + f$  and  $\bar{X} = 52$ .

The value of missing frequency will be

- (a)  $f = 8$       (b)  $f = 10$       (c)  $f = 6$       (d)  $f = 7$

50. If  $N/2$ th item = 50th item,

Which of these above mentioned diagrams will give us the correct value of median?

- (a) (i), (ii), (iii), (iv)      (b) (i) and (iii)      (c) (i), (ii) and (iii)      (d) (ii) and (iii)

51. Which of the following is an explicit cost?

- (a) Estimated rental value of land      (b) Depreciation  
(c) Normal profit      (d) Interest on self invested capital

52. With decrease in output AVC and AC curves

- (a) come closer and closer to each other.      (b) intersect each other  
(c) go farther from each other.      (d) become parallel to each other.

53. The shape of TFC curve in short run is

- (a) parallel to y-axis      (b) parallel to x-axis      (c) inverse U-shaped      (d) U-shaped

54. Increase in demand is said to occur when

- (a) less quantity is demanded at the same price.  
(b) more quantity is demanded at a lower price.  
(c) more quantity is demanded at the same price.  
(d) less quantity is demanded at a higher price.

55. When price of a commodity X falls by 10%, its demand rises from 150 units to 180 units. How much should be the percentage fall in its price so that its demand rises from 150 units to 210 units?

- (a) 30%      (b) 25%      (c) 20%      (d) 28%

56. For a horizontal demand curve the slope will be  
(a) equal to 1 (b) less than 1 (c) equal to 0 (d) equal to infinity
57. Given Marginal Utility of Money = 2 utils and price of X is ₹ 4, a consumer attains equilibrium when he buys 4 units of X. How many units will be purchased by him if  $MU_m$  increases to 4 utils.

Units of X	$MU_x$ (Utils)
1	20
2	16
3	12
4	8
5	4
6	0
7	-4

- (a) 3 (b) 6 (c) 2 (d) 1
58. Out of the 3 points A, B and C, where would a consumer be, if  $MRS < MRE$

- (a) A and C. (b) Only at A. (c) A and B. (d) Only at B.
59. Phase of negative returns is the third phase of law of variable proportions in which  
(a) total product increases at diminishing rate.  
(b) marginal product falls but remains positive.  
(c) total product reaches its maximum.  
(d) total product falls.
60. Which of the following statements is true?  
(a) Rich people do not have scarcity of resources.  
(b) Developed nations do not face any economic problem.  
(c) Economic problem is basically a problem of choice.  
(d) Countries with small population have limited wants.

### (Mathematics)

61. The value of  $\sin(45^\circ + \theta) - \cos(45^\circ - \theta)$  is  
(a)  $2 \cos \theta$  (b)  $2 \sin \theta$  (c) 1 (d) 0
62. If  $\sin \theta + \cos \theta = 1$ , then the value of  $\sin 2\theta$  is equal to  
(a) 1 (b)  $\frac{1}{2}$  (c) 0 (d) -1
63. If  $x^n - 1$  is divisible by  $x - k$ , then the least positive value of  $k$  is  
(a) 1 (b) 2 (c) 3 (d) 4

64. The value of  $1 + i^2 + i^4 + i^6 + \dots + i^{20}$  is  
(a) 1 (b) -1 (c) 0 (d) 2
65. What is the value of  $\frac{i^{4n+1} - i^{4n-1}}{2}$ ?  
(a) 1 (b)  $i$  (c) -1 (d)  $-i$
66. In a town of 840 persons, 450 persons read Hindi, 300 read English and 200 read both. Then the number of person who read neither is  
(a) 240 (b) 290 (c) 180 (d) 160
67. Let  $n(A) = m$  and  $n(B) = n$ . Then the total number of non-empty relations that can be defined from A to B is  
(a)  $m^n$  (b)  $n^m - 1$  (c)  $mn - 1$  (d)  $2^{mn} - 1$
68. The domain and range of the real function  $f$  defined by  $f(x) = \frac{4-x}{x-4}$  is given by  
(a) Domain = R, Range =  $\{-1, 1\}$  (b) Domain =  $\mathbb{R} - \{-1\}$ , Range = R  
(c) Domain =  $\mathbb{R} - \{4\}$ , Range =  $\{-1\}$  (d) Domain =  $\mathbb{R} - \{-4\}$ , Range =  $\{-1, 1\}$
69. The value of  $\frac{1 - \tan^2 15^\circ}{1 + \tan^2 15^\circ}$  is  
(a) 1 (b)  $\sqrt{3}$  (c)  $\frac{\sqrt{3}}{2}$  (d) 2
70. The value of  $\tan 3A - \tan 2A - \tan A$  is equal to  
(a)  $\tan 3A \tan 2A \tan A$   
(b)  $-\tan 3A \tan 2A \tan A$   
(c)  $\tan A \tan 2A - \tan 2A \tan 3A - \tan 3A \tan A$   
(d) None of these
71. In an A.P. the  $p^{\text{th}}$  term is  $q$  and the  $(p + q)^{\text{th}}$  term is 0. Then the  $q^{\text{th}}$  term is  
(a)  $-p$  (b)  $p$  (c)  $p + q$  (d)  $p - q$
72. Sum of  $1^2 + 2^2 + 3^2 + \dots + n^2$  is  
(a)  $\frac{n(n+1)(n+2)}{6}$  (b)  $\frac{n(n+1)(2n+1)}{6}$  (c)  $\frac{n(n+1)(n-1)}{3}$  (d)  $\frac{n(n-1)(n-2)}{3}$
73. Equation of line passing through (1, 2) and parallel to the line  $y = 3x - 1$  is  
(a)  $y + 2 = x + 1$  (b)  $y + 2 = 3(x + 1)$  (c)  $y - 2 = 3(x - 1)$  (d)  $y - 2 = x - 1$
74. If  $a, b, c$  are in A.P., then the straight line  $ax + by + c = 0$  will always pass through  
(a) (1, 2) (b) (1, -2) (c) (2, 1) (d) (-2, 1)
75. The equation of the circle which passes through the point (4, 5) and has its centre at (2, 2) is  
(a)  $(x-2)^2 + (y-2)^2 = 13$  (b)  $(x-2)^2 + (y-2)^2 = 26$   
(c)  $(x-2)^2 + (y+2)^2 = 13$  (d)  $(x+2)^2 + (y+2)^2 = 13$

- 76.** Given that  $x, y$  and  $b$  are real numbers  $x < y, b < 0$ , then
- (a)  $\frac{x}{b} < \frac{y}{b}$                       (b)  $\frac{x}{b} \leq \frac{y}{b}$                       (c)  $\frac{x}{b} > \frac{y}{b}$                       (d)  $\frac{x}{b} \geq \frac{y}{b}$
- 77.** There are 10 lamps in a hall. Each one of them can be switched on independently. Find the number of ways in which the hall can be illuminated.
- (a)  $2^{10} - 1$                       (b)  $2^{10}$                       (c)  $10!$                       (d)  $10^2$
- 78.** Every body in a room shakes hands with everybody else. The total number of shakes is 66. The total number of persons in the room is
- (a) 11                      (b) 12                      (c) 13                      (d) 14
- 79.** The total number of terms in the expansion of  $(x + a)^{51} - (x - a)^{51}$  after simplification is
- (a) 102                      (b) 25                      (c) 26                      (d) None of these
- 80.** If the coefficient of  $x^7$  and  $x^8$  in  $\left(2 + \frac{x}{3}\right)^n$  are equal, then  $n$  is
- (a) 56                      (b) 55                      (c) 45                      (d) 15
- 81.** If  ${}^nC_{12} = {}^nC_8$ , then  $n$  is equal to
- (a) 20                      (b) 12                      (c) 6                      (d) 30
- 82.** The mean deviation of the data 2, 9, 9, 3, 6, 9, 4 from the mean is
- (a) 2.23                      (b) 2.57                      (c) 3.23                      (d) 3.57
- 83.** If the focus of a parabola is  $(0, -3)$  and its directrix is  $y = 3$ , then its equation is
- (a)  $x^2 = -12y$                       (b)  $x^2 = 12y$                       (c)  $y^2 = -12x$                       (d)  $y^2 = 12x$
- 84.** In a non-leap year, the probability of having 53 tuesdays or 53 wednesdays is
- (a)  $\frac{1}{7}$                       (b)  $\frac{2}{7}$                       (c)  $\frac{3}{7}$                       (d) None of these
- 85.** A single letter is selected at random from the word 'PROBABILITY'. The probability that it is a vowel is
- (a)  $\frac{1}{3}$                       (b)  $\frac{4}{11}$                       (c)  $\frac{2}{11}$                       (d)  $\frac{3}{11}$
- 86.** The length of the foot of perpendicular drawn from the point  $P(3, 4, 5)$  on  $y$ -axis is
- (a) 10                      (b)  $\sqrt{34}$                       (c)  $\sqrt{113}$                       (d)  $5\sqrt{2}$
- 87.**  $\lim_{x \rightarrow 0} \frac{\sin x}{x(1 + \cos x)}$  is equal to
- (a) 0                      (b)  $\frac{1}{2}$                       (c) 1                      (d) -1
- 88.**  $\lim_{x \rightarrow 0} \frac{|x|}{x}$  is equal to
- (a) 1                      (b) -1                      (c) 0                      (d) Does not exist

89. If  $f(x) = x \sin x$ , then  $f'\left(\frac{\pi}{2}\right)$  is equal to

- (a) 0                      (b) 1                      (c) -1                      (d)  $\frac{1}{2}$

90.  $\lim_{x \rightarrow \pi} \frac{\sin x}{x - \pi}$  is
